Bachelor's Thesis in Informatics

**What do induction heads do when
pretraining and in-context data are in
conflict?**

**Was machen Induktionsköpfe, wenn die
Vortrainingsdaten und die Kontextdaten im
Widerspruch stehen?**

Author:	Ivan Andre Naranjo Coronel
Examiner:	Prof. Dr. Zeynep Akata
Supervisor:	Stephan Alaniz
Supervisor (External):	Can Demircan
Submission Date:	28.05.2025

I confirm that this bachelor's thesis is my own work and I have documented all sources and material used.

Munich, 28.05.2025

Ivan Andre Naranjo Coronel

Acknowledgments

This work represents the culmination of a journey that began seven years ago—a path I have walked with unwavering dedication, guided and upheld by the grace of God, and sustained by the love of my family: my father Ivan, my mother Ximena, and my brothers Anthony and Christian. Together with the encouragement of my friends and cherished loved ones, their boundless support, faith in me, and warmth of affection have made this achievement possible. To them, I offer my deepest gratitude and say, with all my heart, "Thank you, and I love you."

I extend my sincere appreciation to the team at Helmholtz, who welcomed me into an inspiring community of scientists and individuals. Their brilliance, generosity, and innovative spirit enriched my understanding and propelled me forward each day with fresh ideas and motivation. A special word of thanks goes to Can Demircan, whose unwavering presence sustained me through every challenge of this thesis. His willingness to share his wisdom and guide me with patience and insight has been a gift beyond measure. I am also deeply grateful to Eric Schulz, whose invitation opened the door to this remarkable laboratory and its extraordinary people, setting the stage for this chapter of my growth. Furthermore, I wish to extend my heartfelt thanks to Prof. Dr. Zeynep Akata for granting me the privilege of writing this thesis under her esteemed faculty, an opportunity that has profoundly shaped this work.

1 Introduction

1.1 Section

Citation test [Lam94].

Acronyms must be added in `main.tex` and are referenced using macros. The first occurrence is automatically replaced with the long version of the acronym, while all subsequent usages use the abbreviation.

E.g. `\ac{TUM}`, `\ac{TUM}` \Rightarrow Technical University of Munich (TUM), TUM

For more details, see the documentation of the acronym package¹.

1.1.1 Subsection

See Table 1.1, Figure 1.1, Figure 1.2, Figure 1.3.

Table 1.1: An example for a simple table.

A	B	C	D
1	2	1	2
2	3	2	3

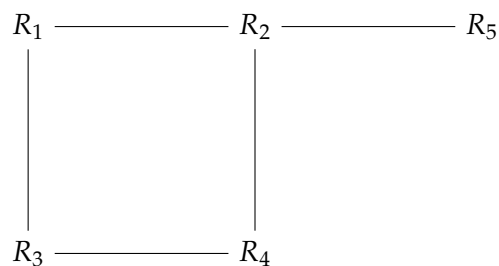

Figure 1.1: An example for a simple drawing.

¹<https://ctan.org/pkg/acronym>

Figure 1.2: An example for a simple plot.

```
SELECT * FROM tbl WHERE tbl.str = "str"
```

Figure 1.3: An example for a source code listing.

Abbreviations

TUM Technical University of Munich
